Question:

In the NoR para 8.7 the last possible time for a warning signal is 16:00 hours.
In the SI 8.5 the last possible time for a warning signal is 17:30 hours.
Could you please clarify?

Answer:

The basis for a boat's decision to participate - especially regarding planning of the trip - is the information given in the NoR.

SI 1.5 states, that if there is a conflict between the NoR and the SI, the wording of the SI takes precedence.

This paragraph does not change RRS 63.5(c) and does not comply with criteria listed in RRS 85.1 and is therefore invalid.

The International Jury has decided that the information given in the NoR stands, and the last possible time for a warning signal for this event will be 16:00 hours on the 23rd August 2025.

Jury chairman

Hans Vengberg
